

Fire Alarm Warning System (FAWS)

BRABOURNE
COMMUNICATIONS LIMITED

- Integrates on site radios to fire alarm systems
- Displays fire panel messages on radio handsets
- Allows site managers to manage an incident from anywhere on site
- Low cost, low risk solution
- Up to 450 messages can be displayed
- Can also be used to display intruder alarms

FAWS has been developed by Brabourne Communications to allow site managers to manage and control fire and intruder incidents more effectively.

Low cost system using conventional PMR radio technology and advanced signalling techniques.

Ideal for large sites with multiple buildings and can be used with most fire/intruder alarm systems.
