- 2 Ni-MH rechargeable batteries
- Twin charger pod
- AC adapter
- Belt clips
- Instruction manual

## Feature "highlights"

### Direct Call

Lets you call everyone in your group at once, or call a single person in your group without anyone else in the group knowing. It is like a "speed dial" directly to the person(s) you want to talk to.

### Caller ID

You can set a nickname which appears on other units' displays when you make an "All Call" or "Direct Call". This is also the name that appears on other radio displays when someone wants to make a direct call to you.

### Auto Channel Change

Lets you easily coordinate a channel change for everyone in your group. You might want to do this should you experience interference on your current channel.

## Codes & part numbers
